PROFILE

Pre-final year Computer Science student at MSIT Delhi with strong foundations in Python, Data Structures & Algorithms, and full-stack development. Passionate about Artificial Intelligence and its practical applications — developed an AI-powered resume builder leveraging the Gemini API. Currently expanding knowledge in core Machine Learning concepts including probability, statistics, and linear algebra. Eager to deepen ML expertise through structured learning.

EDUCATION

Maharaja Surajmal Institute of Technology (MSIT)	Delhi, India
B.Tech in Computer Science Engineering CGPA/Percentage: 88% (Till 5th Semester)	2023 – 2027
Delhi Skill and Entrepreneurship University (DSEU)	Delhi, India
Diploma in Computer Engineering Percentage: 81.3%	2021 – 2024

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, SQL

AI / ML: Gemini API, GenAI Integration, NumPy (Beginner), Pandas (Beginner), ML Fundamentals (Beginner)

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures and Algorithms, OOPs, DBMS, Operating System

PROJECTS

GenAI Resume Builder | GitHub Link React.js, Node.js, Gemini API

- Built an AI-powered web application that generates structured, ATS-friendly resumes from user input by calling Google's Gemini API.

- Handled prompt engineering, dynamic rendering, and PDF export functionality end-to-end.

Video Processing Web Application | GitHub Link React.js, AI APIs

- Integrated third-party AI APIs into a React frontend to enable intelligent video processing features.

- Implemented analysis and summarization capabilities using external AI service calls.

Accommodation Booking Platform | GitHub Link MERN Stack

- Developed a full-stack booking platform with JWT-based authentication and cloud image uploads.

- Covered end-to-end development from database schema design to responsive UI.

Music Management Backend API | GitHub Link Node.js, MongoDB

- Designed secure REST APIs with JWT authentication and role-based access control.

- Built using clean MVC architecture for maintainability and scalability.

INTERNSHIP EXPERIENCE

Unified Mentor – Web Development Intern Jun 2025 – Jul 2025

- Built reusable React.js components and backend APIs using Node.js and Express.js.

- Worked with MongoDB and Tailwind CSS across full-stack development cycle.

CodeSoft – Web Development Intern Nov 2023 – Dec 2023

- Developed responsive web application components and integrated backend APIs.

- Focused on frontend performance optimization and UI responsiveness.
